

CANDY OR MEDICINE ?

As you can see above, many medicines look similar to candy. Because young children can't read and they may often mistake a pill for their favorite candy and risk being poisoned. Always teach children to ask before tasting, touching, or smelling anything. Follow poison safety tips with ALL household medications to prevent unintentional poisonings.

24-Hour Poison Help Hotline: 1-800-222-1222

Supported in part by the Massachusetts Department of Public Health, the Rhode Island Department of Health, Health and Human Services, and member hospitals.
